diligence, the Corporation will commission an independent resource study to restate the Paredones Amarillos resources in compliance with National Instrument 43-101.

"Following the closing of the private placement financing that was announced on March 20, 2002, we have moved quickly to begin the execution of our stated plan to build Vista Gold into the premier option-play on gold. The acquisition of this quality gold resource is an important first step. The acquisition of Paredones Amarillos would effectively double the size of the Corporation's available gold resources, and with an acquisition cost just over U.S. \$1 per ounce of gold resource, it represents significant value for our shareholders," said Jock McGregor, President and Chief Executive Officer.

Vista Gold Corp. is an international gold mining, development and exploration company based in Littleton Colorado. Its holdings include the Hycroft mine in Nevada, the Amayapampa project in Bolivia, and exploration projects in North and South America.
